

Why IAQ in Buildings?

Key Benefits

- Improve Productivity and Decision Making of Employees
- Promote Health and Wellness of Occupants
- Implement Energy Efficient Solutions
- Optimize Performance of Buildings
- Mitigate Environmental Impacts
- Reduce Cost of Maintenance
- Optimize Building Occupancy
- Reduce Cost of Health Care
- Increase Revenue

A cost effective, next generation solution in a single device to deploy throughout a building for continuous long term indoor air quality monitoring...

Future Proof Your Infrastructure

Continuous accurate & precise indoor air quality monitoring in any infrastructure with never before seen information and analytics that result in better indoor spaces, everywhere in the world.

- **Monitor** key indicators of air quality in real time using a single wireless, cloud connected device with 9 sensors (PM₁, PM_{2.5}, PM₁₀, CO₂, CH₂O, VOCs, Temperature, Humidity, Pressure).
- **Ensure** the safest environment & most energy efficient use of systems with access to data anytime anywhere for building managers and employees via a mobile phone or on the web.
- **Determine** if mechanical & air filtration systems are effective, optimize systems, and lower operational costs.
- **Know** when to take action & when and where it is needed with sophisticated alerts via text or email.
- **Obtain** LEED credits for energy & ventilation
- **Elevate** life cycle performance with initial cost.
- **Benefit** from a large scale solution enabling rapid deployment of one device simplifying everything.
